“Europe towards “nearly Zero Energy Buildings”  
in 2020”.

# ECCE Society: BuildLife - Zero Energy Buildings 2020

# News from European development organizations and EU research programmes

# Business Plan 2012 of the SC K&T

# Actions of ECCE which the members want

- Primary interest is on the information and publishing of results and experiences of zero energy building
  - Model building concepts (new and renovation)
  - Measurement results of the technical performance
  - Economic analysis
  - Experiences in operation and asset management
- Knowledge transfer between ECCE Members and from sources outside of ECCE

# Conclusions

ECCE SC Knowledge and Technology will carry out in 2011 the following actions

1. Establish a mutual “ECCE Society of Zero Energy Buildings 2020”
  - for interactive working between ECCE professionals , including all partners of the building, renovation and facility management process
  - Applying most modern IT technology of social networks in Internet
  - Actors will be the professionals of ECCE Member Organisations
2. Write a Position Paper: “Nearly Zero Energy Buildings- Concepts for new buildings and energy renovation”
  - For external information
3. Continue the follow up on, what is happening in the European R&D Community
