The future:

Changes in the weather have already doubled the chance of a very hot European summer like 2003.

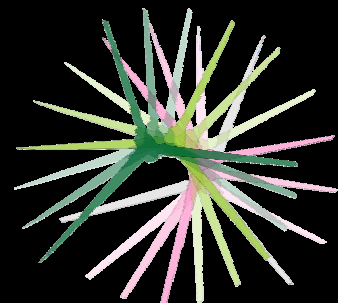

This killed 32,000 people

White Young Green Sustainability Bureau

The future:

The unusually warm summer of 1992 in northern Germany caused crop failures generating losses of €2.5 bn.

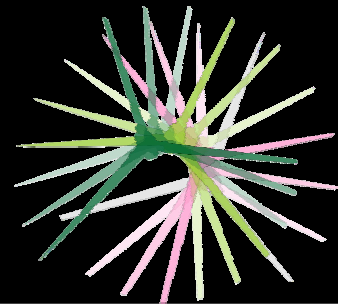

White Young Green Sustainability Bureau

The future:

Reduced access to drinking water will
threaten food supplies

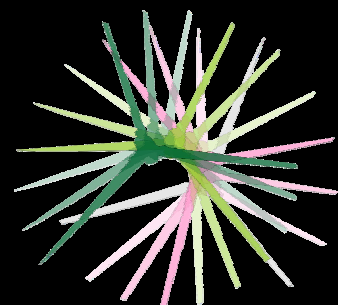

White Young Green Sustainability Bureau

The future:

Climate change could increase the
annual costs of flooding in Europe by
15 by the 2080s.

White Young Green Sustainability Bureau

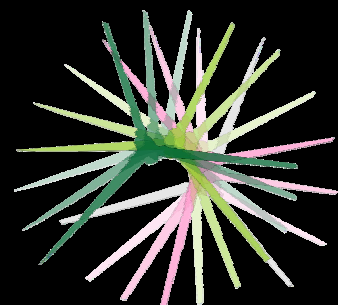

The future:

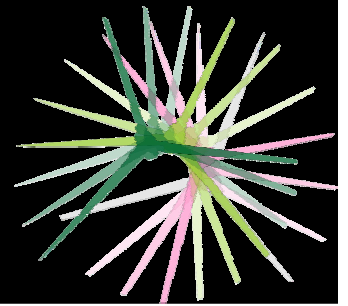

The future:

Existing diseases are likely to become more abundant and exotic species may spread.

The future:

Studies place the cost of climate change at
between 2 – 4% of global GDP.
